The T3300 is a compact, clean, and durable diagnostic ultrasound system featuring a 13.3" touchscreen, especially suitable for mobile medical services. The foldable stand and the detachable probe cup allow it to be wall-mounted, trolley-mounted, set on a table, or handheld for enhanced usability and portability in all situations. T3300 features an enhanced waterproof, impact-resistant design for ultrasound diagnostic examinations outside the clinic. Android OS provides the T3300 with superior cooling and power-saving, as well as an intuitive user experience.
